

Pharmacy Outreach: 24 (or more) cities in 2024

We must counter the Walgreen & CVS abortion rollout to 6 states.

<https://www.prolifewaco.com/pharmacy-outreach.html>

For groups that will deliver an outreach event at CVS or Walgreens at least once each month, Pro-Life Waco will provide:

Four 2' x 2' signs

Two 2' x 4' signs

100 Chemical Abortion flyers, along with the PDF file.

All signs are printed on both sides on corrugated plastic.

You will receive four 2"x2' signs for either Walgreens or CVS, depending on which you choice for outreach.

The 2"x2' signs can be used as yard signs with metal stakes.

<https://tinyurl.com/y33w4x6z>

There is no expectation that these will be the only signs you will use. Use whatever signs you think will be effective.

TOP 4 REASONS FOR PHARMACY OUTREACH

- 1. Public image and financial loss.** Using signs, literature, and conversations, we seek to bring public image and financial losses to CVS and Walgreens pharmacies. This is urgent for EVERY state because of awful national corporate decisions. They will launch their abortion Rx business in NY, PA, MA, CA, IL, and RI and then advance from state to state.
- 2. Provide strong headwinds to the state-by-state expansion.** Walgreens and CVS will face difficulties: resistance from medical professionals, lawsuits resulting from complications, etc. A strong national Pharmacy Outreach must be added to their headache list. Slowing and limiting the state-to-state expansion will be a pro-life success. A feeble response sends a contrary message.
- 3. A message to other pharmacy chains to STAY OUT and maintain pharmacy choice.** Walmart and large grocery chains have ignored the FDA's offer. We must protest strongly and broadly to keep them on the sidelines. Currently, most customers have Rx choice. Our chemical abortion flyer presents the easy steps for prescription transfers.
- 4. Chemical abortion education.** Pharmacy Outreach provides a huge opportunity to inform, educate, and persuade about chemical abortion. Pro-Life Waco has created a three-fold flier on chemical abortion, the procedure used to commit over half of the abortions in America. We engage pharmacy customers and employees, pedestrians, and travelers.
